## GREAT SUMMER RAINS FOR KOORINGAL

As another year draws to a close it could best be described as the one that got away! After good autumn rains and moderate winter rains, we received next to no spring rain when the crops and pastures were screaming for moisture. However the yearly rainfall average has been dramatically boosted in December with over 100mm recorded. The rain has been wonderful for all of our paddock trees, gardens, lucerne paddocks and water storages.

Creek in full flood 22<sup>nd</sup> December 2007

Full dams will take pressure off our town water supply

## COVERING SEASON FINISHED FOR 2007

Equine Influenza has had a significant impact on our horse numbers for 2007 due to the transport restrictions.

Our “new boy” Alert covered a book of 83 mares and returned a very high conception rate. We are delighted with his very placid temperament and are looking forward to his 2008 crop of foals.
